

Little Explorers

Discovering our world with Mrs. Hugg

Children are naturally curious about our world and how it works. In this enrichment class, we are going on a journey of exploration and discovery.

We will study exciting themes with hands-on science experiments, literature, and fun art projects while developing necessary skills and concepts in the areas of reading and science. Join in this exciting process of discovery where questions are encouraged and answers come through exploration.

Let's go exploring!

Mondays and Wednesdays

12-3
